

# TOR JIG<sup>®</sup> S

**Personalized surgical guides system for  
pedicle screws placement**

## Personalized surgical guides system using Artificial Intelligence

**TOR JIG® SC**  
Cervical

**TOR JIG® S**  
Thoracic/Lumbar/Sacral

**TOR JIG® SI**  
Iliac

### Pathologies:

Cervical, back and lumbar spine pathology (canal stenosis, multilevel spondyloarthrosis, spondylolisthesis, scoliosis, dorsal hyperkyphosis, etc..) which requires a vertebral arthrodesis.

### Uses:

Transpedicular arthrodesis. Minimally invasive procedure.

### Information about the device:

Custom Made Medical Device: surgical invasive product, class IIa transient use. Rule 6, Annex VIII, MDR 2017/745.

### Material:

Biocompatible class IIa, sterilizable.

**Shortening of operating times**

**High precision and safety**

**Reduction in X-Ray exposure**

**48h delivery**

Faster recovery

Minimization of risks

Investment 0 versus navigators and surgical robots

**Easy and precise prescription thanks to our software**  
**TOR JIG® PLANNING**

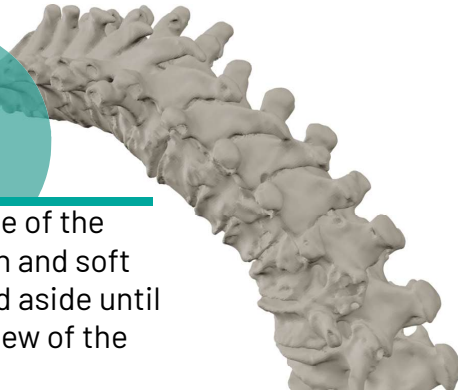

## Surgical technique

### 1. Positioning

01

An incision is made of the pre-defined length and soft tissues are pushed aside until you have a clear view of the vertebrae.

02

The personalized guide perfectly fits the patient's anatomy, so that the positioning is very quick.

### 2. Drilling and insertion of the pedicle screws

03

Kirschner wires placement and orientation X-Ray check. (This is an optional step).

04

Drilling through the guides.

05

Pedicle screws placement.

## Technical Features

## Request process

**TOR JIG® S** MD Custom Made Medical Device

Operating Licence as MD Manufacturer nº: M/919

### Agile process and fast delivery

Sending of the virtual prescription with a CT thanks to **TOR JIG® PLANNING** software

3D biomodel and **TOR JIG® S** surgical guides computer aided design

Manufacturing by 3D printing

Physical product reception
